### Product Features:

The Treasury Bank Rate Linked Call Account is a deposit account with the key features detailed below.

### Key Features:

- Accounts available in US Dollars (USD) and Euros (EUR).
- Interest is calculated daily by reference to the Currency Index Rate ("CIR"). The relevant CIR that will apply is determined based on the currency of the deposit in your Account, which will be as follows:
  - USD Accounts - The upper bound of the Federal Funds Target Rate published by the Federal Reserve's Federal Open Market Committee (FOMC)
  - EUR Accounts - the European Central Bank (ECB) Euro Deposit Facility Rate.
- We will agree with you the Interest Rate that will apply to your Account at account opening. This Interest Rate is linked to the CIR and will track the CIR, which is subject to change.
- Interest is calculated daily based on the Account Balance and is paid into your Account daily (unless otherwise agreed).
- The rate of interest payable on your Account Balance will track the CIR. Any changes to the rate of interest resulting from changes in the CIR will be applied to your Account on the Working Day that the new CIR becomes effective.
- Lloyds Bank may change the rate of interest independently of any changes to the CIR. Where this change is not to your advantage, we will provide you notice one Working Day prior to the new Interest Rate being applied to your Account. Where this change is to your advantage, the new Interest Rate may be applied to your Account immediately without notice.
- To close or withdraw funds from the Account, you must provide Us with a Withdrawal Instruction.

### Benefits:

- The Interest Rate you receive on your Account Balance will increase if the CIR increases.
- You are able to access your funds on the same Working Day, providing a Withdrawal Instruction is received by Us before 5pm USD and 3.30pm EU London time (subject to the Minimum Withdrawal amount).

### Risks:

- The Interest Rate you receive on your Account Balance will decrease if the CIR decreases.
