Scheme & Interchange Fees		

Scheme Fees are paid by us to the Card Schemes on each individual sale and refund transaction.

Interchange Fee is a fee paid by us through the Card Schemes to the Card Issuer on each individual Transaction. Interchange rates are set centrally by the Card Schemes on an industry wide basis. Legislations cap the Interchange charged on cards for consumers at a maximum of 0.30% (Consumer Credit) and 0.20% (Consumer Debit) for transactions where you, us and the card issuer are within the UK. There is no cap on the Interchange charged on Commercial cards. These rates are subject to change by the Card Schemes.

For full list of up to date interchange rates and processing methods, visit [Interchange Rates](#)

Interchange and Scheme Fees are correct as of April 2026 printing but may vary.
