Technical Notes

Essential Digital Skills methodology

Sample
Ipsos MORI interviewed 4,233 participants aged 15+ years in the UK (Great Britain and Northern Ireland) via their face-to-face Omnibus. Data are weighted to represent the UK population in terms of age, social grade, region and working status within the gender variable, and additional profiles on tenure and ethnicity using PAMco data.

Fieldwork dates
10th-27th January 2020

Fieldwork methodology
The Ipsos MORI face-to-face Omnibus (also known as CAPIBUS), was used as the methodology for the Essential Digital Skills study. CAPIBUS interviews a nationally representative sample of those aged 15+ in Great Britain. An additional sample of interviews in Northern Ireland was then conducted to ensure UK representivity (n=150). CAPIBUS uses face-to-face interviewing to ensure no online bias and is conducted in-home rather than on the doorstep, which engages respondents and fundamentally improves the quality of responses.

The sample design incorporates a range of variables to ensure a robust, representative and consistent sample is achieved on a weekly basis. CAPIBUS uses a unique and rigorous sampling method – a form of random location sampling, using a control method applied to field region and sub-region over a robust number of sample points to ensure a good geographical spread. Interviewer quotas are set for gender, age, working status and tenure to ensure the sample is nationally representative – the CACI ACORN geodemographic system is used in the selection process.

The use of ACORN ensures all types of areas are fully represented and the selection of respondents is largely taken out of the hands of the interviewers, helping to eliminate any possible bias in the sample caused by interviewing people all with the same background. CAPIBUS uses a ‘rim weighting’ system which weights to the latest set of census data or mid-year estimates and NRS defined profiles for age, social grade, region and working status – within gender and additional profiles on tenure and ethnicity. Only a limited amount of corrective weighting is therefore needed to adjust the final results on our Omnibus survey, so that they are in line with the national demographic profile.

Essential Digital Skills calculation
The Essential Digital Skills report is based on data collected to help understand if people would be able to do a range of tasks in either a work setting or in their personal lives. These are grouped into six questions: Foundation, Communicating, Handling Information, Transacting, Problem Solving and Being safe and Legal online.

To achieve the Foundation skill, you must be able to complete all of the seven ‘tasks’ included in this question.

To achieve any of the skills in a ‘Life’ context you only need to be able to complete one tasks from that skill question in your personal life, but you also must have the Foundation skill. If you have all five Life skills (as well as Foundation, you are classed as having ‘Life EDS’. Across all five skills there are a total of 29 Life Tasks.

If you are employed, for each of the Life skills you have achieved, you are then able to achieve the equivalent work skill question, by being able to complete one task from that skill question in your working environment. As with Life EDS, if you can complete all five Work skills then you have achieved Work EDS. Across all five skills there are a total of 12 Work tasks.
UK Representivity and Population Estimates

This report includes the numbers of people we have inferred to be in a particular group by extrapolating from our research data (for example, the number of those 15+ in the UK with all seven Foundation tasks is 84% which we have extrapolated to represent an estimated 45.5 million people). Total population figures are taken from the most recently published estimates provided by the Office for National Statistics (2018 mid-year stats for the UK). For the Essential Digital Skills data, percentages are applied to a population base aged 15+ (54,513,000). Total working population figures are taken from the most recently published estimates provided by the Office for National Statistics (2018 mid-year stats for the UK), weighted to the Labour Force Survey stats (Labour Force Study Aug-Oct 2019). For the Essential Digital Skills data, percentages are applied to a working population base aged 15+ (32,801,000). Sources can be found below:

ons.gov.uk/peoplepopulationandcommunity/populationandmigration/populationestimates/articles/overviewoftheukpopulation/august2019
ons.gov.uk/employmentandlabourmarket/peopleinwork/employmentandemployeetypes/timeseries/mgrz/lms

Whilst every care has been taken to ensure the robustness of our data, our data accuracy is limited by its sample size, and therefore there is a margin of error that exists around any figures reported. All significance testing is calculated at the 95% confidence level, with the 95% confidence interval to be used for all population extrapolations. This means that the population size of any group, actually lies in a range which we have calculated and included in this set of appendices.

Impairment classification

The following question was asked to the respondents in the survey to establish impairment status:

‘Do any of these condition(s) or illness(es) affect your ability to carry out day-to-day activities?
Select all that apply’
1. Addiction, e.g. drugs, alcohol, gambling
2. Vision, e.g. blindness or partial sight
3. Hearing, e.g. deafness or partial hearing
4. Mobility, e.g. walking short distances or climbing stairs
5. Dexterity, e.g. lifting and carrying objects, or using a keyboard
6. Learning, understanding or concentrating
7. Memory, e.g. forgetting conversations or appointments
8. Mental health e.g. depression, anxiety, obsessive compulsive disorder (OCD)
9. Stamina, breathing or fatigue
10. Socially or behaviourally (associated with a mental health condition, or with a developmental disorder like autism or ADHD (attention deficit hyperactivity disorder))
11. None of these conditions severely affect my ability to carry out day-to-day activities
99. Don’t know
97. Prefer not to say

In the report, nets were created such that ‘Has an impairment’ is a combination of any impairments (codes 1-10); ‘Sensory (sight or sound)’ is a combination of vision and hearing (codes 2 or 3), ‘Physical’ is a combination of mobility, dexterity and stamina, breathing or fatigue (codes 4, 5 or 9) and ‘Learning or memory’ is a combination of learning and memory (codes 6 or 7).
Employment classification

The following question was asked to the working respondents in the survey to understand their workplace:

Which of the following best describes the industry your company operates in?
1. Telecommunications
2. Technology
3. CPG/FMCG
4. Retail
5. Financial Services
6. Not for Profit
7. Manufacturing & Automotive
8. Travel
9. Media & Advertising
10. Government
11. Education
12. Medical
13. Public service
14. Engineering
15. Service industry
16. Something else (specify)

Which if any of these activities do you regularly do at work?
1. I sit at a desk
2. I deal with customers or clients directly e.g. face-to-face, email, phone, social media
3. I usually work in the same location as my colleagues
4. I use technology at work e.g. computer, tablet, smartphone
5. I work in the same location every day
6. I handle other people's data/information
99. None of these
Essential Digital Skills statements

Foundation Skill

- I can turn on a device and log in to any accounts/profiles I have
- I can use the available controls on a device (e.g. mouse, keyboard, touchscreen etc)
- I can use the different menu settings on a device to make it easier to use (e.g. change the font size to make it easier to read)
- I can find and open different applications/programmes on a device
- I can connect a device to a Wi-Fi network
- I can open an internet browser to find and use websites
- I can update and change my password when prompted to do so

EDS for life

Communicating Skill

- I can set up an email account
- I can communicate with others digitally using email or other messaging applications (e.g. WhatsApp or Messenger)
- I can use word processing applications to create documents (e.g. a CV or a letter)
- I can share documents with others by attaching them to an email
- I can communicate with others using video tools (e.g. Facetime or Skype)
- I can post content on social media platforms (e.g. Facebook, Instagram or Snapchat) for example messages, photographs, video etc.

Handling Information & Content Skill

- I can recognise what information or content may, or may not, be trustworthy on websites/apps
- I can use search engines to find the information I'm looking for (e.g. search for news using a browser such as Chrome, Internet Explorer or Safari)
- I can use bookmarks to save and retrieve websites and information
- I can store information online and access content from a different device (e.g. using the cloud)
- I can organise my information and content using files and folders (either on my device, across multiple devices, or on the cloud)
- I can use the internet to stream or download entertainment content (e.g. films, music, games or books)

Transacting Skill

- I can set up an account online that enables me to buy goods or services (e.g. Amazon account, eBay, John Lewis etc.)
- I can access and use public services online, including filling in forms (e.g. Vehicle tax, Voting registration, ordering repeat prescriptions, booking doctor appointments)
- I can use credit/ debit cards or other forms of online payment to buy goods/services online (e.g. PayPal, WorldPay)
- I can upload documents and photographs when this is required to complete an online transaction
- I can manage my money and transactions online securely, via websites or Apps (e.g. bank account)
Problem Solving Skill
- I can use online tutorials, web chat, FAQs and forums to solve problems
- I can use online tutorials, web chat, FAQs and forums to improve my skills in using the internet and digital Apps/products/services
- I can use the internet to find information that helps me solve problems

Being Safe and Legal Online Skill
- I can assess the risks and threats involved in carrying out activities online and act accordingly (e.g. use security software)
- I am careful with what I share online as I know that online activity produces a permanent record that can be accessed by others
- I make sure not to share or use other people’s data or intellectual property without their consent
- I can respond to requests for authentication (e.g. re activate an account when I’ve forgotten my password)
- I can keep the information I use to access my online accounts secure, by using different and secure passwords for websites and accounts
- I can set privacy settings on my social media and other accounts
- I can identify secure websites by looking for the padlock and ‘https’ in the address bar
- I can recognise and avoid suspicious links in email, websites, social media messages and pop ups and know that clicking on these links is a risk
- I can update my computer security systems when necessary to prevent viruses and other risks

EDS for Work
Communicating Skill
- I can use digital collaboration tools to meet with, share and collaborate with people (e.g. Skype/Google docs/Dropbox etc)
- I can set up and manage an account on a professional online network/community, (e.g. LinkedIn, Total Jobs, Indeed)

Handling Information & Content Skill
- I can access, synchronise and share information across different devices (e.g. manage a calendar or appointment system via phone or desktop

Transacting Skill
- I can manage digital records and financial accounts (e.g. expenses, budgets) through digital systems
- I can access salary and expenses information digitally, including password protected payslips

Problem Solving Skill
- I can use the internet to find information that helps me solve problems
- I can use appropriate software, including a spreadsheet, to manipulate and analyse data
- I can use different digital tools to improve my own productivity i.e. saving time or working more efficiently
Being Safe and Legal Online Skill

- I can assess the risks and threats involved in carrying out activities online and act accordingly (e.g. use security software)
- I am careful with what I share online as I know that online activity produces a permanent record that can be accessed by others
- I make sure not to share or use other people’s data or intellectual property without their consent
- I can respond to requests for authentication (e.g. reactivate an account when I’ve forgotten my password)
- I can keep the information I use to access my online accounts secure, by using different and secure passwords for websites and accounts
- I can set privacy settings on my social media and other accounts
- I can identify secure websites by looking for the padlock and ‘https’ in the address bar
- I can recognise and avoid suspicious links in email, websites, social media messages and pop ups and know that clicking on these links is a risk
- I can update my computer security systems when necessary to prevent viruses and other risks
