

COMMERCIAL BANKING

YOUR GATEWAY TO THE UK

GBP PAYMENTS

Expertise

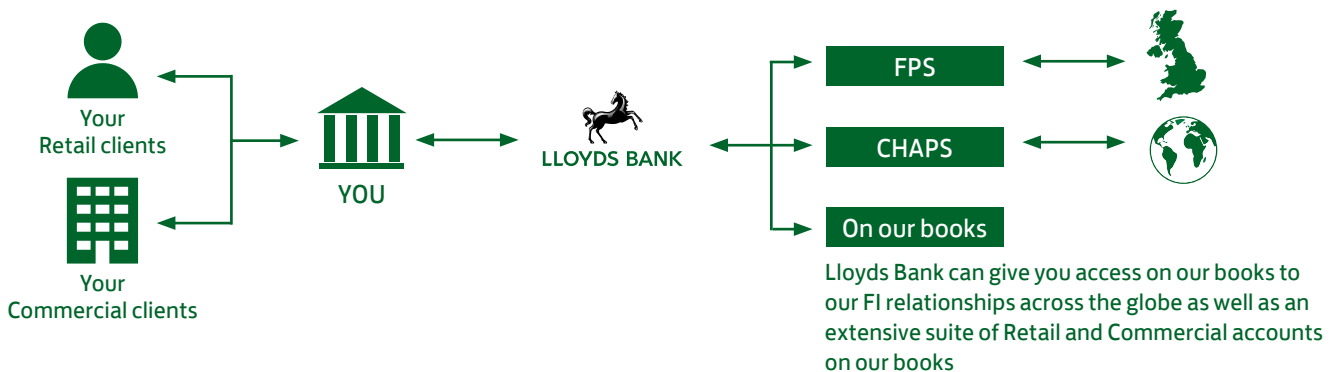

At the heart of our GBP payments proposition is access and expertise in all 4 UK Clearing Schemes.

Lloyds Bank's expertise in GBP payments

Direct member of all UK payment schemes.

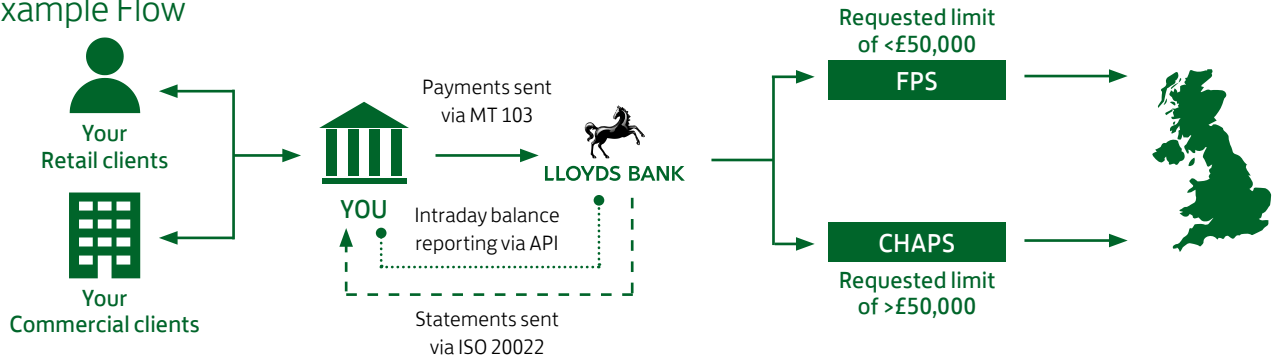

Clearing	Type	Payment type
CHAPS	RTGS	High value, real-time
Faster Payments Service (FPS)	Near real-time, intraday settlement	The UK's immediate payments service
Bacs	Low value ACH	Non-urgent, low value debits and credits
Cheque and Credit Clearing	Paper cheques	Non-urgent

- Lloyds Bank is part of Lloyds Banking Group; the largest domestic UK bank, operating the UK's largest digital bank and branch network, and over 30 million banking relationships in the UK.
- Bank has extensive experience as a UK clearing bank and helps to shape the future of clearing services by taking a leading role in numerous industry innovation initiatives – We touch 1 in 3 GBP payments.
- Dedicated FI Coverage team with specialist payment product advisory to support your needs.
- We have invested for the future and delivered our new cash and payments capabilities in one infrastructure – **Lloyds Bank Gem®**.

LLOYDS BANK

Example Flow

Flexibility

You choose the channel; you choose your clearing preferences.

You determine the method by which you want to initiate your payments appropriate to your operating model and needs be that via SWIFT MT, ISO 20022, API, attended or unattended channels.

You select your preferences as to how those payments are made.

In the above example you send all your GBP your payments flow to our central BIC – LOYDGB2L.

You have requested that we send all > £50,000 UK reachable flow via CHAPS, < £50,000 reachable flow via FPS and where the beneficiary account cannot be reached via FPS, via CHAPS.

Omni-channel

SWIFT FIN, ISO 20022, API, our attended channel (Lloyds Bank Gem Connect), and our unattended channel (Lloyds Bank Gem Direct) are all available to you for both payment generation and reporting.

In the above example you send all your GBP your payments flow to our central BIC – LOYDGB2L via SWIFT MT 103, but you want to receive all statements via ISO 20022, with additional capability of requesting ad hoc intraday balance reporting via API.

Preferencing

You can determine at implementation or in an individual transaction your method of Payment.

You could send us one file of all your GBP payments and select that transactions above a certain value are always sent via CHAPS.

You also have the optionality to determine in and individual MT 103 your preferred method of payment in Field 72

You could also embrace the 24/7 nature of the Faster Payments Service by ensuring all payments post CHAPS cut off are sent via FPS where possible

Charges Differentiation

- BEN / SHA / OUR
- Guaranteed OUR
- PSD2

Time of transaction charging where applicable and monthly Invoice based charging for all other agreed price points with automatic debit to your Nostro.

SWIFT GPI

We went live in 2019, we also were the first bank globally to introduce GPI Instant in 2020.

This means regardless of electronic payment channel – you will see live transaction updates in the SWIFT gpi Tracker.

For CHAPS flow – each GPI Bank updates the Tracker.

For GPI Instant we currently act as an Intermediary updating the Tracker with updates from the Faster Payments Service.

This means regardless of clearing all your GBP payments are all visible on the SWIFT gpi Tracker.

ISO 20022

Our Lloyds Bank Gem capability is built for the future to ensure we are ISO ready when you are.

We shall begin migrating in November 2022 – The current date for CHAPS migration to ISO 20022 is June 2022, and Faster Payments 2023/4.

We fully support the SWIFT Transaction Management Platform and will have the capability to both send and receive SWIFT ISO 20022 from November 2022 when the SWIFT Migration begins, from that point for payment messages we will only be sending MX instead of series MT taking advantage of the SWIFT Transaction Management Platform capability.

My Standards

We support all SWIFT standards and our message standards guides for both MT and ISO 20022 are available for validation on SWIFT MyStandards. We utilise SWIFT MyStandards to provide format specifications and to provide a format validation capability, enabling you to validate adherence of your payment formatting to our specifications. [Click here to find out more.](#)

STP Payment Processing

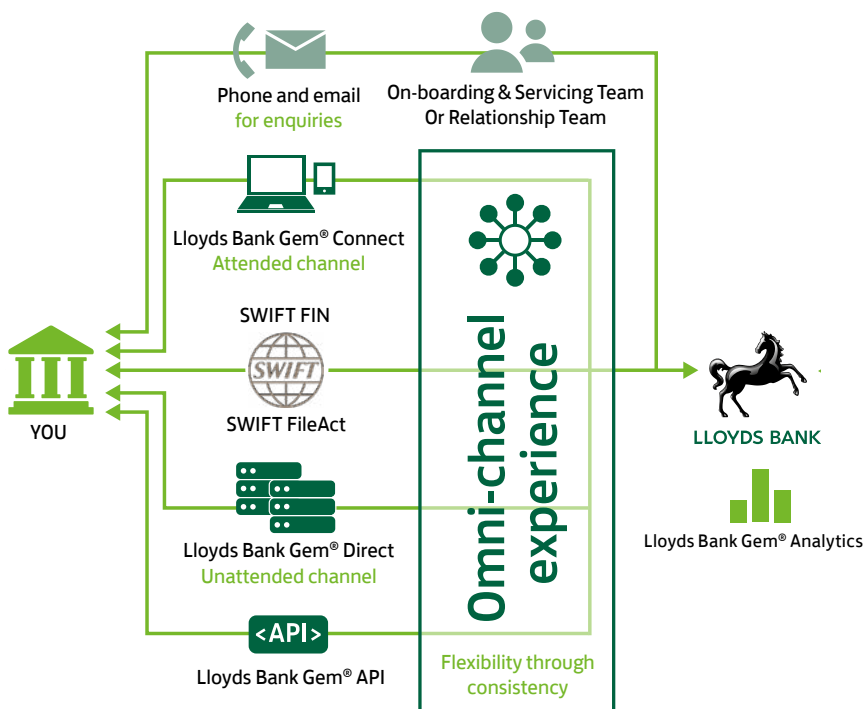

We aim to process all of your payments straight through. So providing the payment instructions have the necessary information to execute the payment to the beneficiary/ beneficiary's bank (and pass through sanction screening) we will make them.

On the rare occasion an item cannot be processed we will return via MT199 for a commercial payment instruction. The response will be sent automatically and instantaneously once we receive the rejection. Hence no non-STP charges are ever applicable.

Confirmation of Payee

We can validate the beneficiary sort code and account number via our Confirmation of Payee API or via Lloyds Bank Gem Connect, giving you and your customers an efficient means of validating beneficiary details prior to initiating your payment to us.

Convenience in choice of connection

Cut-off Times

Format	CHAPS*	FPS†
MT 103/103+	17:25 GMT	N/A – 24/7
